

Milan, Italy, February 4, 2025

To Whom It May Concern,

I am writing this letter of recommendation in support of Mr. Davoud Nikkhoy in his application for PhD programs or pursuing his career. I have known Davoud since he attended one of my workshops in robotics at the Politecnico di Milano University. After that, he has been cooperating in several of my projects and research in my lab in the fields of ROS, Gazebo, Navigation, SLAM, Robotics, Simulation, and Computer Programming. I have observed Davoud in several research projects entitled “Two-Wheeled Balancing Robot’s Kino-dynamic Model and Control”, “Cart and Pole Tracking Control Using Reinforcement Learning”, “Simulation of Agricultural Robots with ROS, Gazebo, and RVIZ”, and “Control of Robots in ROS”. His research covers state-of-the-art sophisticated machine learning methods. Recently, we collaborated on a paper titled “Fuzzy Q-Learning with Fuzzified Bellman Equation for Unmanned Ground Vehicle Navigation”, which has been submitted to the Canadian Conference on Electrical and Computer Engineering 2025. Furthermore, we are working on two additional papers related to path generation and control of robots based on Fuzzy Reinforcement Learning, as well as a ROS-based robot simulator based on his research, prepared for submission in highly ranked international journals.

During our cooperation, I have observed Davoud as a great team member and simultaneously a strong individual engineer. He manages his assigned tasks efficiently and meets deadlines effectively. His behavior and manner earn admiration from his colleagues and me. Davoud has shown perseverance despite challenges during his work. He is an independent self-starter while eagerly listening to his advisor and teammates. He is diligent and determined to succeed. Additionally, he has a remarkable talent for writing code and firmware. I can confidently call him an experienced and practical engineer. Davoud is an intelligent young researcher who has demonstrated outstanding performance throughout our collaborations. He has shown great enthusiasm and dedication in his work. His strongest capabilities include programming, mechatronics, and robotics. In addition, he has an exceptional background in embedded firmware development and both practical and theoretical aerospace engineering. His enthusiasm, determination, perseverance, discipline, and work ethic are widely admired by his peers and me.

To sum up, I find Davoud to be a friendly, smart, courteous, and serious individual who knows exactly what he wants. He is an excellent team member while fully capable of working independently, and he is a fast learner. Without any doubt, he is one of our top researchers. I strongly urge you to consider his candidacy in your institute, as I believe he would be an excellent addition to your team. It is my pleasure to support Davoud’s application for an academic or industrial opportunity. Please let me know if I can provide any further information. You may reach me at mohsen.jalaeian@polimi.it, or via WhatsApp at +39(351)412-8062.

Sincerely,

Mohsen Jalaeian Farimani, PhD

Assistant Professor,

Department of Electronics, Information and Bioengineering (DEIB),
